KAVEH GLASS INDUSTRIAL GROUP

2026-2027 NEW COLLECTION

The pace of change in the glass industry is rapid.
Even more far reaching changes may be on the way.

We realize the importance of meeting and exceeding our customer's expectations for high quality products. Every plan we make and every action we implement, are driven by the desire for quality and is focused on the following principles:

- Providing outstanding product quality
- Being good at servicing our customers
- Providing a worthwhile place for our employees to work
- Commitment to social responsibilities
- Continually improve environmental performance

A vital component in our quest for quality is the constant investment in our people, facilities, and technologies. We continue to focus on having market leading facilities, which is essential to our purpose to provide the highest standard of quality that we are proud to deliver to our customers. We believe that the best results will be achieved by enabling our company in not only in leadership, policies and strategies, but also in managing our resources productively and especially leading our people creativity to develop well-managed processes. If there is a constant in the world, it is change. We are proud to be open-minded and we do our best to manage the changes in this every-day-changing life.

Sincerely,
Ebrahim Asgarian
President & CEO
